## **Ashlar stones of the district Saalfeld-Rudolstadt (part 2)**

GERHARD WEISE

### **Abstract**

In the northern part of the district Saalfeld-Rudolstadt sand- and limestones of Younger Paleozoic and Triassic age were excavated in small stone quarries. Until the beginning of the 20<sup>th</sup> century they were used as broken, cut and building stones. From middle age to the end of the 19<sup>th</sup> century sandstones of Volpriehausen (area Rudolstadt) and Sollig-Sequence (area Gölitz-Bad Blankenburg) were being important, too.
